

GENERAL ELECTRIC GE GLOBAL RESEARCH

Garching bei München

The Facility Group, with AUKETT + HEESE as General Planner, have been appointed by General Electric to design and build the fourth worldwide and first European GE Global Research Center.

The building is situated at the Munich Technical University research campus in Garching, which is between Munich Airport and Munich City Centre and offers within its 10.000 sq.m. area research facilities for GE alternative energy systems, power, sensors, Electro-technology, advanced medical imaging, automotive applications, and in addition conference facilities for 150 people.

Completion: summer 2004
